

ARF-WL8-TRH

Wireless translator module

The translator controls the wireless devices and connects to the fire control panel. This allows the control panel to manage and control the wireless devices seamlessly as if they were a part of its loop.

FEATURES:

- The translator communicates with wireless devices operating in the range of 868 MHz with a maximum power of 25 mW.
- The translator controls a combination up to 127 wireless expander modules and detectors in a wireless mesh network and transmits all events to the fire control panel.
- The translator is powered directly by the analogue loop of the fire control panel.
- Operating temperature range: $-10\text{ }^{\circ}\text{C}$ to $+55\text{ }^{\circ}\text{C}$

The product complies with the requirements of the EN54-17:2005, EN54-18:2005 and EN54-25:2008 standards
