

ARF-WL8-RI

Wireless remote indicator

The wireless remote indicator is used to indicate the status of a fire detector when a detector is installed in a hidden location or out of sight.

FEATURES

- Bi-directional wireless communication
- Intelligent algorithms
- 10-year battery life
- Self-optimizing wireless frequency and amplitude algorithms
- Operating temperature range: $-10\text{ }^{\circ}\text{C}$ to $+55\text{ }^{\circ}\text{C}$
