## ARF-WL8-EXP

Wireless expander module

The wireless expander module provides a convenient method to increase radiocommunication range beyond that possible from a single translator by relaying the radio communication to further expanders or directly to the wireless field devices.

FEATURES:

- Dynamic routing for all expanders and field devices

- Bi-directional wireless communication

- Capable of linking up to 240 fully intelligent wireless field devices

- Supports full device intelligence

- 2 built-in inputs/outputs

- Operating temperature range: −10 °C to +55 °C

LPCB
LOSS PREVENTION CERTIFICATION BOARD

The product complies with the requirements of the EN54-18:2005, EN54-25:2008 standards
